

**LISTING OF THE CLAIMS**

1. (Currently Amended) A back light unit, comprising:  
a lamp housing; and  
a plurality of lamps respectively having a low pressure ~~first~~ electrode and a high pressure ~~second~~ electrode and arranged in the lamp housing so that the low pressure ~~first~~ and the high pressure ~~second~~ electrodes are alternately disposed in one side of the lamp housing.
2. (Currently Amended) The back light unit according to claim 1, further comprising:  
a diffusion plate located on the lamp housing; and  
an optical sheet located on the diffusion plate.
3. (Currently Amended) The back light unit according to claim 1, wherein the low pressure ~~first~~ electrode and the high pressure ~~second~~ electrode are respectively arranged in a zigzag fashion.
4. (Currently Amended) The back light unit according to claim 1, wherein the low pressure ~~first~~ electrode and the high pressure ~~second~~ electrode are alternately arranged by N-number (where N is a positive integer more than 2) in one side of the lamp housing.
5. (Currently Amended) A liquid crystal display, comprising:  
a back light unit having a lamp housing, a plurality of lamps respectively having a low pressure ~~first~~ electrode and a high pressure ~~second~~ electrode and arranged in the lamp housing so that the low pressure ~~first~~ electrode and the high pressure ~~second~~ electrode are alternately disposed in one side of the lamp housing, a diffusion plate disposed on the lamp housing, and an optical sheet disposed on the diffusion plate; and  
a liquid crystal panel disposed on the back light unit and having a plurality of liquid crystal cells arranged in matrix form.

6. (Currently Amended) The liquid crystal display according to claim 5, wherein the low pressure first electrode and the high pressure second electrode are respectively located in a zigzag fashion.

7. (Currently Amended) The liquid crystal display according to claim 5, wherein the low pressure first electrode and the high pressure second electrode are alternately arranged by N-number (where N is a positive integer more than 2) in one side of the lamp housing.
